**Dmitry Goldgof Named Fellow of the  
International Association of Pattern Recognition**

**Tampa, Fla. (August 31, 2010)** – Computer Science and Engineering Professor Dmitry Goldgof was named a Fellow of the International Association of Pattern Recognition (IAPR) at the biennial meeting in Istanbul, August, 2010, for his contributions to computer vision, pattern recognition and biomedical engineering.

According to the Constitution and Bylaws of IAPR, the number of fellows elected every two years must not exceed 0.25% of the total IAPR membership. Both service to IAPR and scientific contributions to the field of pattern recognition are taken into account in the selection process.

Pattern recognition is most frequently used in applications for speech recognition, ZIP code processing on hand-written envelopes, and image recognition, such as human faces.

*The University of South Florida is one of the nation's top 63 public research universities and one of only 25 public research universities nationwide with very high research activity that is designated as community engaged by the Carnegie Foundation for the Advancement of Teaching. USF was awarded \$380.4 million in research contracts and grants in FY 2008/2009. The university offers 232 degree programs at the undergraduate, graduate, specialist and doctoral levels, including the doctor of medicine. The USF System has a \$1.8 billion annual budget, an annual economic impact of \$3.2 billion, and serves more than 47,000 students on institutions/campuses in Tampa, St. Petersburg, Sarasota-Manatee and Lakeland. USF is a member of the Big East Athletic Conference.*
